SPLENDID NEW NOVELTIES

Now Offered for the First Time

Every one knows the Japanese Quince, with its gorgeous red flowers, but few have seen the new named varieties. These come in distinct shades, whereas the ordinary sorts may be any shade, usually more of a brick red than a scarlet.

A STRIKING NOVELTY SIBERIAN FLOWERING ALMOND

A wonderful dwarf Flowering Almond from Siberica, with profuse masses of lovely pink and white flowers, completely covering the shrub. Being dwarf in habit it can be used where there is not room for the taller growing Flowering Almond. It is only about three feet in height; has good fall foliage in shades of red; and is the only striking dwarf flowering shrub that can be grown in the mountain states.

Heavy 2 to 3 feet bushes.....	\$2.00
Heavy 18 to 24 inch bushes.....	\$1.50

THE FINEST OF THE WHITE FLOWERING SHRUBS

This is a shrub we have not considered as hardy in Colorado, but we have discovered that after it becomes established it is perfectly hardy. Last spring it attracted more attention than any shrub we had on the place, when it was literally smothered with dazzling white flowers. No other white flowering shrub approaches it.

PEARL BUSH. Good strong stock.....	\$1.25
